

Senior Web Developer - Tools

Company

Rockstar Games

Location

Edinburgh, Scotland, UK

Employment Type

Full-time, Permanent

Working Arrangement

In-office position

Job Overview

Rockstar Games is seeking a passionate Web Developer with strong experience in React and .NET to help build modern, scalable applications that support complex game production workflows.

The role involves working closely with designers, back-end engineers, and stakeholders across the organisation to deliver high-quality user experiences and powerful internal tools.

About the Team

The Rockstar Games Tools Team creates and maintains software tools used by game development disciplines across Rockstar Games projects. These tools support the creation and management of large-scale game productions.

Key Responsibilities

- Design and develop complex, high-performance web applications that support project management and collaboration.
- Build accessible front-end components and applications using React.
- Integrate front-end applications with ASP.NET Core using C#.
- Contribute to architectural decisions and continuous improvement of the codebase.
- Develop comprehensive automated test suites.
- Improve web application performance and reliability.

Required Skills and Experience

- Degree in Computer Science or 5+ years of professional web development experience.
- 5+ years of experience working with React.

- 5+ years of experience working with .NET.
- Experience with real-time technologies such as WebSockets and SignalR.
- Experience with automated testing, shared codebases, and source control.
- Knowledge of Agile software development practices.
- Understanding of web security best practices.
- Passion for web technologies and keeping up with modern development trends.

Desirable Skills (Preferred)

- Experience with authentication and authorisation systems, including OAuth and identity providers.
- Experience building chat, collaboration, or messaging platforms.
- Understanding of UI/UX principles and design systems.
- Experience with Elasticsearch or OpenSearch.
- Exposure to observability tools.
- Knowledge of Rockstar Games titles and enthusiasm for video games.

Application Requirements

Applicants should submit:

- CV
- Cover letter explaining relevant skills and experience

Successful applicants will be contacted by a Rockstar recruiter regarding the next stages of the recruitment process.

Equal Opportunities Statement

Rockstar Games is committed to creating an inclusive workplace based on equal opportunity, dignity, and respect. Reasonable accommodations are available for qualified applicants and employees who require support during the recruitment process.
